The Shipping Instructions Message

This message is used for transferring preliminary shipping information to PostNord. It contains information about any shipments that may contain one or more shipment items to the same consignee at the same time. If there are a large number of shipments during one particular day, do not send a separate file for each shipment.

Unless otherwise agreed, information is treated as shipping instructions for all services. No invoicing takes place before the physical shipment item has been registered.

It is essential, that the information in the message corresponds to the information on the shipping document as any discrepancies may lead to a reduction in the quality of the service. For this reason, it is also important to send correction messages to those countries that support corrections when information is changed. This is accomplished by providing different function codes in the message. A description of how this works for the different message formats is available in the reference manuals for individual formats.

General Descriptions should always be read in conjunction with PostNord's product separate Terms and Conditions that can be found at <https://www.postnord.se>, <https://www.postnord.dk>, <https://www.postnord.no> and <https://www.postnord.fi>.

Business Rules

Shipping Date (EDIFACT) / Loading Date (XML)

It is important that the shipping datetime/loading datetime reflects the date when the shipment actually will be shipped. PostNord is using this date in the daily capacity planning and to calculate estimated time of arrival.

Issuer Codes

The issuer code indicates which of the companies within PostNord there are agreements with. I.e. which company has issued the customer number that you are using.

Z11 PostNord Denmark

Z12 PostNord Sweden

Z13 PostNord Norway

Z14 PostNord Finland

Definition of parties

Code	Name	Mandatory to use	Description
CZ	Consignor*	Yes	Sender of the goods for outbound shipments, normally the part which has an agreement with transport company, not necessarily representing the pickup address.
CN	Consignee*	Yes	Receiver of the goods, normally the party to be notified.
FP	Freight payer	Yes	Payer of freight. Customer number and issuer code sufficient for identification.
PW	Pickup party*	No	Address where item should be picked up, if different from consignor. For more information, see "Other Dependencies" below in the document.
DP	Delivery party*	No	Address where the items physically will be delivered, if different from CN.
OS	Original shipper	No	Party used as a branding address for notifications, e.g. when 3PL. For more information, see "Other Dependencies" below in the document.
ZRR	Return address*	No	Delivery address of a return shipment if different from consignor, if relevant printed on the label. For more information, see "Other Dependencies" below in the document.
NI	Notify party	No	Party to be notified if different from consignee. Only in use in Sweden today.

* This parties always need a valid full address.

Services and Additional Services

The codes for available services and additional services for Swedish Customers is available in our APIs, as well as authorized combinations of services and additional services.

On developer.postnord.com those are under Shipment Section

<https://api2.postnord.com/rest/shipment/v3/edi/servicecodes>

<https://api2.postnord.com/rest/shipment/v3/edi/adnlservicecodes>

<https://api2.postnord.com/rest/shipment/v3/edi/servicecodes/adnlservicecodes/combinations>

On the shipping label, the service names should be written without "PostNord".

Dependent Information

This section describes under which circumstances information indicated as dependent in the reference manuals is mandatory.

Services

Code, XML	Code, EDIFACT	Name And Dependent Information
17	Z17	PostNord MyPack Home Additional service FlexChange (C7) is mandatory on PostNord MyPack Home except when additional service Delivery without POD (A6) or SameDay (F1) is chosen. SMS or Email is mandatory in Consignee party.
18	Z18	PostNord Parcel Within the Nordics, the PostNord standard label shall be used. Outside the Nordics, DPD routing table, barcode and label shall be used. Contact name and telephone number are mandatory. New Additional Service Early Collect (38) Domestic Sweden. New Additional Service Age Check (D8) Domestic Sweden.
19	Z19	PostNord MyPack Collect Additional service Optional Service Point (A7) • Is optional in/to Sweden and Denmark. • Is mandatory in/to Norway and Finland as well as to countries outside the Nordics. • Additional services Notification by Letter (A2), Notification by SMS (A3), Notification by E-mail (A4) Either of these additional services must be used. To countries outside the Nordics Notification by Letter (A2) is not available. • Additional service Cash on Delivery A1 • Special contract needed for Denmark.

Available countries are presented in the price list and/or the facts sheet on each Nordic Countries web site.

20	Z20	PostNord Return Pickup SMS number is mandatory on both Consignor and Consignee. E-mail address is optional.
24	Z24	PostNord Return Drop Off Reference If an item is scheduled for return from Norway via one of the Norwegian Post collection points, use of the reference qualifier/type "carrier's reference number" (CN) is mandatory. The value that must be used is "post_no". <i>Addressing – Consignor</i> All information that was placed in the consignee party in the original shipment should be placed in the consignor party for the return freight. <i>Addressing – Consignee</i> Customer number should be placed in the consignee party. Norway When returning shipments from Norway, the consignee address must be an address in Norway e.g. subsidiary, agent or shipper. If PostNord is handling the customs clearance process of returns from Norway, the consignee address that must be used differs depending on if the shipment has a shipping label with Sorting Code POS or not. <i>With Sorting Code "POS" the address should be:</i> Company name co PostNord AS PostensGodssenter NO-0068 Oslo <i>Without Sorting Code "POS" the address should be:</i> Company name co PostNord AS 3. Industrivei 25 NO-0668 Oslo Finland, Denmark, Sweden and countries outside the Nordics.

The consignee address for returns from Finland/Denmark/Sweden should either be an address in the country from which the returns are being sent, or an address in the country from which the original shipment was sent. The exact return solution should be tailored for each individual customer.

Email and SMS number is mandatory on the return part.

30	Z30	MyPack Home Small Domestic Service in Sweden
37	Z37	Tompallsdistribution It is mandatory to use the additional service Pallöverföring (Pallet Exchange) (46) together with this service.
42	Z42	Expresspaket Domestic Service Additional Service Mottagaren Hämtar (38) changes name to Early Collect.
44	Z44	Bud Distributionslösningar Requires Special Contract, Domestic Service
48	Z48	InNight Requires special contract. It is mandatory to present retailer number, sorting position, shipment item type (parcel type) and weight. Other information might be mandatory depending on client contract. E.g. volume. Available shipment item types are: PC - Parcel CW - Cage Roll OA – Quarter Pallet (40x60 cm) AF – Half Pallet (60x80 cm) PE - Pallet (80x120 cm) OF – Special Pallet (larger than PE)
49	Z49	Inight Reverse Requires special Contract
52	Z52	PostNord Pallet Shipment item type (parcel type) is mandatory. The only types that are authorized are: OA – Quarter Pallet (40x60 cm) AF – Half Pallet (60x80 cm)

PE – EUR-pallet (80x120 cm)
OF – Special Pallet (larger than PE)

New additional service Return Pickup Private (E3). CarryOut (E2) and Pickup Handover (E7) can only be used in combination with Return Pickup Private (E3).

58	Z58	InNight Forwarding Requires special contract. It is mandatory to present retailer number, sorting position, shipment item type (parcel type) and weight. Other information might be mandatory depending on client contract. E.g. volume. Available shipment item types are: PC - Parcel CW - Cage Roll OA – Quarter Pallet (40x60 cm) AF – Half Pallet (60x80 cm) PE - Pallet (80x120 cm) OF – Special Pallet (larger than PE)
59	Z59	Retail Delivery Requires Special Contract. Retail Number is mandatory
69	Z69	InNight Systemtransporter Requires special contract. It is mandatory to present retailer number, sorting position, shipment item type (parcel type) and weight. Other information might be mandatory depending on client contract. E.g. volume. Available shipment item types are: PC - Parcel CW - Cage Roll OA – Quarter Pallet (40x60 cm) AF – Half Pallet (60x80 cm) PE - Pallet (80x120 cm) OF – Special Pallet (larger than PE)

83	Z83	PostNord Groupage It is mandatory to present a shipment ID in the shipping instruction message when using this service. The shipment ID must be a GS1 GSIN number. It is also mandatory to present pick up party name and address. For Shipment Item Type parcel it is mandatory to present the type in the message. For pallets we appreciate if you indicate the type. The Shipment Item type codes to be used are: PC – Parcel OA - Pallet (40x60 cm) AF – Half Pallet (60x80 cm) PE - Pallet (80x120 cm) OF – Special Pallet (larger than PE) •Weight and measurements are mandatory on item level •Long goods: Long goods is <35 kg and >2,4 m •If additional service Private Receiver (D2) is selected, additional service FlexChange (C7) or FlexDelivery (A6) must be stated.
85	Z85	Postnord PartLoads Requires special contract and setup. Also added item types depending on the contract with the customer. This Service requires different communication and message type.
91	Z91	Postpaket Utrikes Postpaket Utrikes must not be sent to Finland, Denmark, Estonia, Latvia and Lithuania. Exceptions are: • Åland with country code FI and postcodes 22000-22999 or country code AX. Greenland and The Faroe Islands with country codes GL and FO. These country codes must be used. DK is not valid country code for these parts of Denmark.

Additional Services

Code	Name	Dependent Information
A1	Cash on Delivery	•Amount type/qualifier •Amount must be > 0 •Currency code must always be in the currency of the consignee country. •Payment reference •Payment reference type/qualifier •Account type/qualifier In Sweden there are two different Giro systems Plus Giro (Z04) and Bank Giro (Z01). These codes indicate which of the systems that must be used. Account type for accounts in the other Nordic countries should always be indicated using the same code (ADE). •Account number The number should be presented in the same way as domestic payments in the consignee country. •COD with amount in Euro must have an International Bank Account Number (IBAN) and a Business Identifier Code (BIC).
A2	Notification by letter	Address information at Consignee is used.
A3	Notification by SMS	SMS number placed in the consignee party.

Rules for SMS numbers are described in the section “Checks”. If the Original Shipper name has been stated then this is the name that is presented in the SMS message. Otherwise the consignee name is used. If the consignee name is missing, the legal name from the contract is used.

A4	Notification by E-mail	Email address placed in the consignee party.
A5	Insurance	Used to ensure the shipment.
A6	Delivery without POD	This additional service is not allowed on service PostNord MyPack Home (17) to Norway.
A8	Dangerous Goods LQ	Weight of shipment item.
A9	Notification by Phone	Telephone number placed in the consignee party.
A7	Optional Service Point	Use of a delivery address is mandatory. Service point ID and addresses must be retrieved from our service point open API. Service points outside the Nordics are available via the same API. Information about the API is available at developer.postnord.com .
B8	Driver Notification	Telephone number placed in the consignee party.
B9	Dangerous Goods	If customer in Sweden, Denmark, Finland no extra information is needed. For Norwegian customer a Dangerous Goods section of the message must be presented. DGD - Dangerous Goods Declaration must be attached to the shipment. Current laws and regulations for dangerous goods in each country must be followed.
C1	Recipient Freight	The customer number with PostNord of the party that is to be billed for the freight must be placed in the consignee party. E.g. if the shipment is

bound for Norway and the recipient should pay for the freight the recipients customer number with PostNord Norway must be placed in the consignee party.

C2	Print Return Label	New add-on service Print Return Label (C2) is introduced in Sweden. With additional service Print Return Label you can provide the recipient (return sender) with a returnID in the form of a QR code instead of needing to send a physical return shipping label. The return shipping label is then printed by PostNord when the sender presents the QR code at the service point. You create the QR code via the PostNord return API, developer.postnord.com/api/docs/shipment. QR code is valid for 60 days. When using REK returns, the requirement for the additional service Credit without Invoice Basis (FE) is also required.
C4	ID Check	This additional service is only allowed on service PostNord MyPack Home (17) to Sweden.
C5	Delivery Notification	SMS number and/or e-mail address placed in the consignee party. This additional service is only allowed on service PostNord MyPack Home (17) to Sweden.
C6	Delivery Confirmation	SMS number and/or e-mail address placed in the notify party. This additional service is only allowed on service PostNord MyPack Home (17) to Sweden.
C7	FlexChange	SMS-number is mandatory in the consignee party. E-mail is optional in consignee party.
D1	Return to sender	

Domestic in Sweden.

Email and SMS number is mandatory on the return part.

D2	Signature Assurance	PostNord Parcel (18) is only allowed on service to Denmark and Sweden.
D3	Delivery Advice	SMS and/or email address shall be placed in the consignee party. This additional service is only allowed on service PostNord Parcel (18) to Denmark and Sweden.
D5	Private receiver	It is mandatory to have SMS-number for Consignee.
D6	Before 9	Email and/or SMS number is mandatory on the consignee part.
D7	Before 12	Email and/or SMS number is mandatory on the consignee part.
E2	Carry-Out	Pickup at agreed location. For new service PostNord Return Pickup (20). For Postnord Groupage (83) and Postnord Pallett (52) only in combination with Return Pickup Private (E3).
E3	Return Pickup Private	To be used when the sender of the return is a private person. For service Postnord Groupage (83) and Postnord Pallett (52) Addon Service E6 is mandatory together with this.
E6	Pickup Confirmation	For service Postnord Groupage (83) and Postnord Pallett (52) Either SMS or email is mandatory in consignor party
E7	Pickup Handover	Physical handover of parcel to driver. For new service PostNord Return Pickup (22).

For Postnord Groupage (83) and Postnord Pallett (52) only in combination with Return Pickup Private (E3).

F1	SameDay	SMS-number is mandatory in the consignee party. E-mail is optional in consignee party. LoadingDate date/time (Date or format code) must be 203. Earliest and Latest Delivery date/time is mandatory. Length, width, height and weight is mandatory on Item level.
F2	SameDay Late Pickup	Can only be used together with SameDay (F1).
2	Container Rent	Only together with Service Code 52
5	Reduced Retention	Only with Service Code 19
7	Extended Retention	Only with Service Code 19
22	Digital Identification	Identification with Mobile BankID at Service Points.
D8	Age Check	The age requirement to be allowed to sign for the shipment item must be presented as a reference on shipment item level. The reference type to be used is ZAG. The only allowed values with this reference type are 16, 18 and 20.
24	ID Check Extended	The personal identity number of the consignee must be stated in the reference field. Format rules for personal identity number are described under the subject "Checks". The number can either be presented on shipment- or shipment item level.
38	Early Collect	For Service 42 and 18. For Service 18, you need to add the Service Point as a DeliveryParty. Both in EDI and printed on the label.

You get the Service Point from our api:

developer.postnord.comUapi/locations

46	Pallet Exchange	It is mandatory to present the number of pallets in the shipment as well as the account number (customer number) from which the pallets should be removed and the customer to which pallets should be added in our pallet exchange system. The use of the customer number in this case is more like an account number where pallet “assets/liabilities” are recorded. Hence it is placed together with other types of account numbers in the messages. The exact placing of both number of pallets and customer numbers are format dependent. Please, refer to the reference manuals for each format respectively.
47	Alcoholic Beverage	Together with this additional service it is mandatory to also present use the additional service 25 – Ålderskontroll (Age Check).
Q1	Time Agreed Delivery	Requires special contract. Together with this it is mandatory to add a reference of type FLW.
B7	Carry In	Requires Special Contract
57	Notification Before Delivery	SMS number placed in the consignee party.
D9	Climate Compensation	
E1	Tyres	Requires special contract.
E5	Collect in Store Label Only	Requires special contract
74	Return Wrapping	

E4	Collect in Store	Requires special contract
E8	Split Shipment	Requires Special Contract. Additional Service for Pallets addressed to Postnord Norway containing items.
97	Warranty Return	For InNight Reverse only.
98	Return Of Wrapping	For InNight Reverse only.
99	Item Returns	For InNight Reverse only.
D4	DigiLOCK Delivery	Requires Special Contract and Setup.
G1	Tail Lift 1-10 Palletts	For Partloads only.
G2	Tail Lift 11-18 Palletts	For Partloads only.

Other Dependencies

Shipping Software ID

When the shipping instructions message has been tested and approved by PostNord, the shipping software creating this message is allocated an ID (if tested in Sweden). If the software is intended for licensing to PostNord customers, presenting this ID in the message, as well as software name and version, is mandatory.

Sender Communication Address (UNB address)

A communication address can consist of one to three parts: ID, code list/qualifier and route/internal ID. The ID must always be used, the other parts are optional. However if for example both ID and code list are stated in the contract both must be presented in the shipping instruction message as well.

Consignor Reference Number

If consignor reference is presented in the shipment instructions message, the reference can be used as a search criteria in conjunction with customer number in our track & trace.

Return Party

It is mandatory to use Return Party if the address to which the shipment should be returned to differs from the consignor address. The only country that is authorized for the Return Party is the country of the consignor or the consignee.

For shipments destined for Norway, when consignor country isn't Norway, the address in Return Party must be an address in Norway. Unless otherwise agreed, the addresses used should be:

For shipment items with the delivery party ID 0413898 (routing value POS on the label):

Company Name
PostNord AS
PostensGodssenter

0068 OSLO

For shipment items with other delivery party ID than 0413898:

Company Name
PostNord AS
Alfaset 3. Industrivei 25
0668 OSLO

Pickup Party

Please note! Use of Pickup Party is mandatory if the consignor address differs from the actual pick up location. When using the service Groupage (83) it is always mandatory to present the pickup location even if it is the same as the consignor address.

Original Shipper

Original Shipper should be used if the selling company differs from the consignor, e.g. when the selling company uses a third party logistics provider. When original shipper is used, all notifications will contain the name of the original shipper instead of the name of the consignor. The same goes for the information about the consignor in our track & trace.

Dimensions and Weight Information

Only needs to be used if stated in the agreement.

For further information about each service and additional service please go to www.postnord.se/dk/no/fi.

33E	SSCC	GS1 (SSCC)
Z10	S10	S10
ZDP	DPD	DPD
ZZZ	ZZZ	OTHER

17	CUSTOMER	CUSTOMER (relabeling necessary)
18	18	Norwegian for GS1, TG specific barcode, DPD, STE/S10.

Packaging danger level code

Code	Description
1	Great danger
2	Medium danger
3	Minor danger
4	Not assigned

Equipment

Code	Description	Comments
Used in EQD EDIFACT		
EFP		A flat euro-pallet that may be exchanged.

Number of units

Code	Description	Comments
Used in EQN EDIFACT		
2		Transport units

Checks

The system must have the following built-in checks:

- A check that all information marked as mandatory in the reference manual for the chosen format has been provided.
- A check that dependent information has been provided in accordance with the rules described under the heading “Dependent Information”.
- A built-in block to prevent the allotted shipment item number series from being exceeded. When all the numbers in a number series have been used, it should not be possible to print out PostNord’s shipping labels or create the Shipping Instructions EDI message.
- A memory (date stamp) for previously used shipment item numbers so it is impossible to reuse the same number twice. Reusing a UPU S10 number series is not allowed. Once a number series has been used, a new one should be ordered. To order a number series, please refer to the chapter about shipment item numbers in the document

“Implementation Guidelines for PostNord’s Shipping Labels” document. However, this is not valid for shipment item numbers issued by GS1 (SSCC), which may be reused after 18 months.

- A check that the provided paying customer number contains the correct number of digits:
 - Customer number with PostNord Sweden: 8 or 10 digits
 - Customer number with PostNord Denmark (Parcels): 9 digits
 - Customer number with PostNord Denmark (Groupage): 8 digits
 - Customer number with PostNord Finland: 8 or 10 digits
 - Customer number with PostNord Norway: 7 digits

This applies for the consignor party and the freight payer party alike.

- A check that SMS number when using additional service Notification by SMS complies with one of these formats:
 - Deliveries in Sweden:
+ or 00 [country code starting with 3 or 4].
Swedish local number
 - Deliveries in Finland:
+ or 00 [country code starting with 3 or 4].
Finnish local number
 - Deliveries in Norway:
+ or 00 [country code starting with 3 or 4].
Or Norwegian local number
 - Deliveries in Denmark:
+ or 00 [country code starting with 45]
Or Danish local number
- A check that email addresses have the format:

[character]@[character].[valid top-level domain]

- A check that account numbers comply with account specifications for each country.

If the system is intended for license to PostNord's clients, services/additional services that require special contracts must not be generally available. These services must only be made available to customers after verification with PostNord to ensure that necessary contracts are in place.

Testing the EDI Message

Before a message is used in production, test messages must be sent to PostNord. The test message should contain all the services and additional services intended for use in production (i.e. the services and additional services that have been indicated for use in the Customer Case Description for Transport EDI). It should also contain the combinations that will be used, e.g. PostNord MyPack Collect with Cash on Delivery and Notification by SMS.

If any new service/additional service is added after a successful test and production start, then a new test message must be submitted before this service is allowed in production.

Test messages should be sent to a specific testing address using a mutually agreed communication protocol, i.e. if the production messages are to be sent using FTP over the Internet, then the test files should also be sent the same way.

The test address is indicated at the end of the reference manual for each respective message format.

After a successful test the solution is authorized for use in production. There will be extra supervision during the two first weeks of production by PostNord staff. It may occasionally be necessary to revert to the test phase.
